

Bharath Kusetty

kusettybharath7111@gmail.com | 8919431641 | LinkedIn | Github

EDUCATION

NBKR INSTITUTE OF SCIENCE AND TECHNOLOGY

B.TECH IN COMPUTER SCIENCE

ENGINEERING

Mar 2024 | Nellore

CGPA:8.86/10.0

(Till 5th sem)

K.A.C GOVERNMENT JUNIOR COLLEGE

2020 - 2022| Nellore

Class XII : 885/1000

Z.P HIGH SCHOOL

2015 - 2020| Nellore

Class X : 10.0/10.0

SKILLS

PROGRAMMING

Languages:

• Python • SQL • HTML • CSS

Familiar With:

• C • Java • JavaScript

PERSONALITY

- Detail-Oriented
- Team Player
- Problem Solver
- Adaptable
- Curious
- Creative Thinker

CERTIFICATIONS

- Python Essentials Course Completion | **Certificate**
- SQL (Basic) Certification | **Certificate**
- Technical Quiz Competition | **Certificate**
- Data Visualisation Certification | **Certificate**
- Nestle E-Learning | Sustainability | **Certificate**

EXPERIENCE

YBI FOUNDATION | DATA SCIENCE AND AIML

Jun 2024 - Aug 2024 | Virtual | **Certificate**

- Completed a 3-month ISO-certified AI/ML internship at YBI Foundation; built a Random Forest sales prediction model with 25
- Designed a preprocessing pipeline with NumPy and Pandas for 14K+ entries, boosting model performance.
- Visualized model output using Matplotlib and Seaborn to identify and refine prediction gaps.

PROJECTS

TIC-TAC-TOE | A CLASSIC GAME BUILT WITH PYTHON

Project Repository | **Github** | **Live Demo**

- Developed a terminal-based Tic-Tac-Toe game using Python with optimized logic for user interaction, enhancing user interaction and problem-solving skills through structured code implementation.
- Overcame game logic and user interaction challenges, improving problem-solving skills, refining code optimization, and deepening Python expertise to create user-friendly applications.

CALCULATOR | WEB DEVELOPMENT

Project Repository | **Github** | **Live Demo**

- Engineered a fully functional calculator using HTML, CSS, and JavaScript, implementing core arithmetic operations with real-time input validation and a user-friendly interface.
- Designed a responsive layout with CSS and enhanced interactivity with JavaScript for smooth usability and dynamic functionality.

CALENDAR | WEB DEVELOPMENT

Project Repository | **Github** | **Live Demo**

- Leveraged HTML, CSS, and JavaScript to create a dynamic calendar with year and month navigation.
- Implemented a responsive layout with smooth animations and a light/dark mode switch for better usability.
- Enabled seamless date selection and navigation for an interactive user experience.

CRYPTOPY | EXPLORING CRYPTOGRAPHY TECHNIQUES WITH PYTHON

- Executed a comprehensive cryptography project, showcasing adeptness in **Python programming**. Implemented a diverse range of encryption algorithms, including **Caesar cipher**, **Playfair cipher**, **Hill cipher**, **One-Time Pad (OTP)**, **RSA**, and **Diffie-Hellman**.
- His undertaking delves into the realm of secure data transmission and storage, highlighting my technical prowess in algorithmic implementation and my commitment to ensuring information privacy.
- The project showcases my ability to transform complex cryptographic concepts into practical solutions, highlighting my commitment to data integrity and confidentiality.
